

May 19<sup>th</sup> Meeting

Members	Time	Venue
Mariano FERREIRONE Hamza ABDOULHOUSSEN Killian CRESSANT Hadrien ROCHU	10h-12h	Lab CRAN

**Agenda**

1. Review on the presentation

**Review on the presentation**

We have shown the slides to Mariano and presented him the main element of the presentation.

Mariano advised us to :

- present ourselves at the beginning of the presentation
- maybe change "State of art" because it means how things are used nowadays in technologies
- present quickly the reasoner as engine which used logic to infer data
- add the restriction presented (page 11)
- explain not deeply ontologies in the schema (owl/rdf/rdfs/Turtle) and knowledge graphs in the only schema (rdf)
- for the output made by the `python` structure, compared it to *protégé*
- conclusion : summarize the work done and present what we learned during the project

**Tasks**

- To prepare for the presentation
