April 13th Meeting

Members	Time	Venue
Mariano FERREIRONE Hamza ABDOULHOUSSEN Killian CRESSANT Hadrien ROCHU	14h30-15h	Google Meet

Agenda

1. Review of the work

Review of the work

We have seen with Mariano the probleme of constraints. Maybe to start, we don't have to infer all the information, but try to put the constraints in the knowledge graphs so that an interpreter can read and understand the constraints on the file. Besides, we have also seen the state of the art on the article, we have to focus on the main points because it is not possible to explain ontologies and knowledge graph in on month.

Tasks

— Finish the example
— Try to extract a constraint
— Continue the article

Next meeting : *April 20th 2022*
